SILABARIO

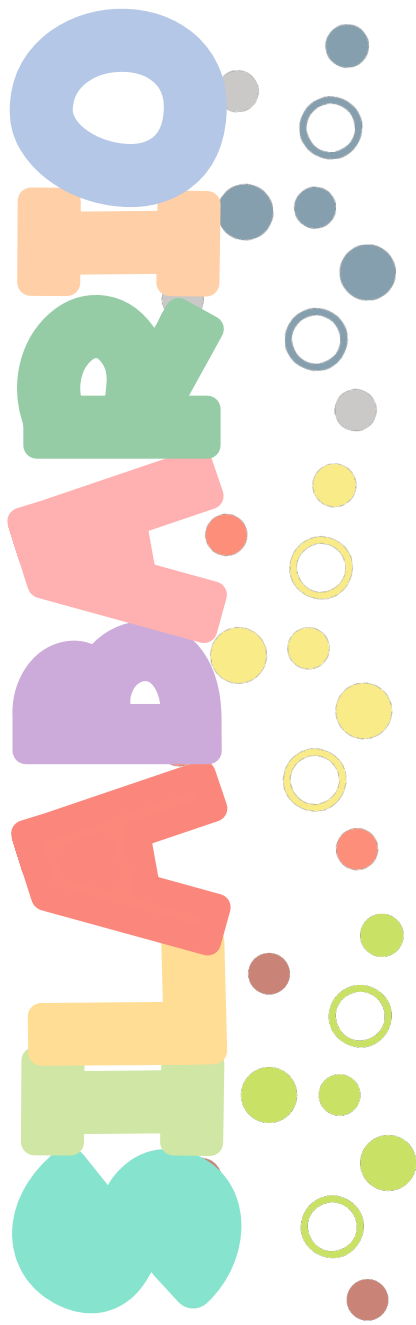

Materiales que he utilizado para su construcción

1. 3 Cartulinas de color blanco, un total de 2 cartulinas y media, las he plastificado para poder limpiarlo fácilmente y conservarlo mejor.
2. Fundas para plastificar de 125 micras
3. Guillotina para recortar las tarjetas
4. Forro de libro en tiras que serán el soporte de las tarjetas
5. Feltro rojo para el bolsillo de vocabulario
6. Cinta adhesiva transparente

Construcción

1. En primer lugar he plastificado las cartulinas, podéis utilizar cartón u otro soporte a continuación las he unido con cinta adhesiva.
2. He recortado las tarjetas del pdf y las he plastificado.
3. Después pegamos en la cartulina las tiras de forro de libro con cinta adhesiva/ silicona
4. Por último pegamos el nombre del silabario, y lo decoramos al gusto. También añadimos el bolsillo de vocabulario y ¡Listo para aprender!

COMBINACIÓN DE MÉTODOS

¿Aprendemos a leer?

¿Por qué utilizar un solo método de lecto-escritura si podemos coger lo mejor de cada uno de ellos?

Δ la hora de enseñar a leer y escribir encontramos varios métodos:

1. Método silábico
2. Método Foto silábico
3. Método Global, entre otros.

Este silabario permite el aprendizaje de la lecto-escritura partiendo de varios métodos, sólo tenemos que personalizarlo a nuestro alumnado. Con él podemos trabajar las vocales y el abecedario, ya que, al encontrarse en la parte superior cada una de las letras por separado, nos ayudará al aprendizaje del mismo. Su estructura permite conocer las partes más pequeñas de las palabras, es decir, las vocales> consonantes> Sílabas> palabras y por último la construcción de frases.

Podemos aprender el sonido de las letras y su grafía acompañándonos de las imágenes, o cada una de las sílabas partiendo de las fotos. En cada Letra encontrarás su combinación con las vocales (sílabas) y una imagen asociativa a cada una de las combinaciones consonante-vocal. Podemos también construir palabras o construirlas nosotros (los profes) y descomponerla en sílabas. Cada sonido de las vocales está representado por un color, que será el mismo para cada una de las combinaciones con las consonantes.

Pero cual es el mejor método? El que mejor se adapte al niño, por ello no nos centramos en un método único sino que intentamos adaptar el método a las necesidades y características del alumnado.
