ACTIVIDADES MOTRICIDAD FINA

SERIACIÓN Y CLASIFICACIÓN CON PINZAS

- La motricidad fina comprende movimientos pequeños y precisos. El trabajo de motricidad fina estimula la coordinación oculo-manual, y entrena movimientos complejos que suponen un refinamiento de la motricidad gruesa.
- Este cuaderno propone actividades diferenciadas de seriación y clasificación por colores y figuras.
- Cada ficha plantea una única actividad, de forma que se puedan elegir aquellas que se desee trabajar.
- Se acompaña de una ficha de continuación de trabajo a utilizar tras ejecutar una propuesta y de una ficha de finalización de actividad.
- Es recomendable empezar por ejercicios sencillos e ir incrementando paulatinamente la dificultad.
- Las propuestas pueden adaptarse fácilmente a los colores y materiales de que se disponga.
