

## COMPRENSIÓN ORAL 2º ESO INGLÉS

### PLANET EARTH: EMERGENCY CALLING

#### TRANSCRIPCIÓN LABIAL:

**Nota:** para llevar a cabo esta lectura, es conveniente que, al tratarse de un diálogo, el texto sea leído por dos personas.

**Anne:** Hello everyone, and welcome to Earth News Podcast. My name is Anne and today our guest is Megan, the famous meteorologist.

Hi! Megan.

**Megan:** Hello! I'm happy to be here today.

**Anne:** So, I'm going to start by asking you, what's your favourite kind of weather? Do you prefer hot weather or cold weather?

**Megan:** Oh! Let's see... I like warm weather, I like the cold weather for about a month but no more. So, I really like the summer when I can spend a lot of time swimming in lakes and I often go camping. When you're camping, you can enjoy nature, and I love that.

**Anne:** Have you lived in a place where the weather was really hot or cold?

**Megan:** Yes, I lived in Egypt for two years, and they have summer an extreme summer, if you ask me.

*(Anne laughs)*

**Anne:** And did you like living in Egypt with that weather?

**Megan:** Yes, I did like it. But I love my four seasons! So I missed them a lot when I lived there.

**Anne:** You said before that you love nature.

**Megan:** Yes, I love nature.

**Anne:** And you wrote a book about nature?

**Megan:** Yes, I did.

**Anne:** What is the name of your book?

**Megan:** The name of my book is *Earth and Friends*:

**Anne:** What is it about?

**Megan:** Well, it's a book about how we can help our planet. I'm really worried about global warming and how it is affecting on Earth's climate system. For example, the weather is getting more extreme with catastrophic storms, severe fires or melting polar ice.

**Anne:** And, do you think human activity is responsible for global warming?

**Megan:** Yes, because human activity increases the abundance of greenhouse gases in the atmosphere. Most climate scientists agree that this increase in greenhouse gases is the main reason for global warming.

**Anne:** Oh! I see, but can we do something to stop this? You said before that your book is about solutions to help our planet.

**Megan:** Yes, that's right!

**Anne:** Can you give us ideas to save the planet?

**Megan:** Yes, there are many things that we can do to help our planet. For example, you can turn off lights and devices (like the TV) you're not using, when you are not in a room. This will reduce the energy that you use.

**Anne:** Great!

**Megan:** Of course, you must always remember the 3Rs: reduce, reuse, and recycle. By reducing the amount of things that we buy, reusing them or, recycling them, we can really help our planet. Also, we can use a bike or just walk.

**Anne:** Perfect! Well, we don't have time for more, so thank you Megan, and to our listeners, if you're hearing this message, you've listened to our new episode all the way to the end, and for that, I thank you. In our next episode I'll have the pleasure of hosting Greta Thunberg... (Voice fading away)
